Quillstack — Senior Software Engineer, Platform $195k–$225k
Undisclosed (via Bluefin Talent) — Senior Backend Engineer $180k–$210k base
Arcturus Health — Senior ML Engineer €95k–€115k

Method & caveats

- 13 threads matched the keyword/ATS prefilter; 11 passed rule scoring and were read by the on-device model.
- Compensation, size and funding are copied verbatim from emails and checked against the source text; values not found in the email are left blank unless filled from public data (marked “public data”).
- Ranking uses annualized midpoint in USD (hourly × 2,080; non-USD via a fixed approximate rate). Base vs. total comp is labeled where stated.

Sources: Fixture registry (https://example.org/mossbank)

Generated by Pocket Agent — inference ran locally; no email content left the device (company lookups used public sources with only the company name).
